

SUGGESTED DIRECTIONS FOR ARSENIC SAMPLE COLLECTION PROCEDURES

This sample is being collected to determine the **Arsenic** levels in your tap water.

Please read the instructions carefully before proceeding.

1. This sample bottle contains a small amount of nitric acid. This is to remain in the bottle. Use caution when opening the bottle that you do not touch the acid.
2. After turning on your water, fill the sample bottle to the neck. Be careful not to overflow the bottle.
3. Tightly cap the sample bottle. Please complete the bottle label and chain of custody at this time.
4. Ship or deliver the sample to Pyxis Laboratories with the chain of custody filled out.
5. Results will be provided to customers when reports are generated.

Call Pyxis Laboratories, LLC. (503-254-1794) if you have any questions regarding these instructions.
